### **Care of Pottery**

Functional pottery is oven, microwave and dishwasher safe. It is not suitable for the stovetop. For oven use, pots should be heated with the oven. Do not transfer pottery from the refrigerator to a hot oven. This could cause the piece to crack. Teapots should be warmed first with hot water before adding boiling water.

Raku pottery is decorative only. It is not food safe and will not hold water. Wash by hand in warm water.

We hope you enjoy your purchase.
